

The background of the advertisement is a photograph. It shows a close-up of a hand wearing a teal nitrile glove. The hand is holding a white, textured, rectangular cleansing cloth. The cloth is being held over a green surface, which appears to be a medical drape. In the lower-left background, a portion of a white medical device, possibly a catheter or tube, is visible. The lighting is bright, highlighting the texture of the cloth and the glove.

**WIPE AWAY RISKS THAT
CAN LEAD TO CAUTI.**

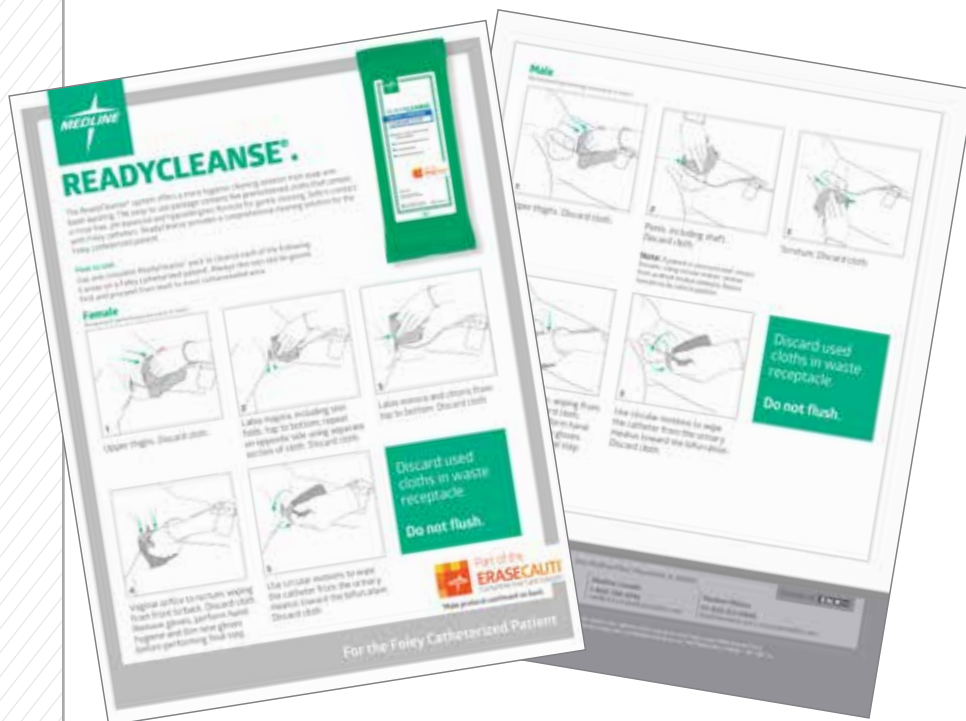

ReadyCleanse®
Meatal & Perineal Cleansing Cloths

POST CATHETERIZATION MAINTENANCE CLEANSING.

ReadyCleanse is specially designed for comprehensive meatal and perineal care to reduce the risk of developing a catheter-associated urinary tract infection (CAUTI). In 2008, CAUTI has been defined as a preventable, adverse event that should never occur by the Centers for Medicare and Medicaid Services (CMS). CMS no longer reimburses hospitals for CAUTIs that occur within the hospital environment.¹

Our five cloth cleansing protocol follows nursing best practices for a compliance driven, standardized method for daily care of the Foley catheterized patient. Each package contains five cloths pre-moistened with a pH-balanced, non-antiseptic formula for gentle cleansing.

Item No.	Description	Pkg.
MSC095311	ReadyCleanse Cleansing Cloths, 5/pk	30/cs

Please see LIT769R for an illustrated guide to our 5 cloth cleansing protocol

Part of the
ERASECAUTI™
Comprehensive Care Solution

BENEFITS
